INSULL TURNED OVER TO FEDERAL OFFICERS

As "End Of Trail" Is
Finally Reached

CHICAGO, May 8.—Samuel
Insull, America's most celebrated
prisoner, was clamped in
jail today in the city of Chicago—
the city from which he once
dominated a vast utilities empire
capitalized at more than
two billion dollars with branches
in thirty-two states.
It was exactly one o'clock p.
m. when Insull was brought to
the doors of the Cook County
Jail.

CHICAGO, May 8.—Bail
for Samuel Insull was fixed at
\$200,000 when the former
Utilities king was brought be-
fore the bar of justice in an
American court for the first
time today.

He was arraigned before
Federal Judge John P. Barnes.
Insull was remanded to the
custody of United States Mar-
shal H. C. W. Laubheimer
pending a decision as to whether
or not Insull could raise the
\$200,000 bond.

CHICAGO, May 8.—Samuel Insull
virtually collapsed at "the end of
the trail" today.
A few minutes after the former
multi-millionaire public utilities
king was formally turned over to the
local federal authorities at the con-
clusion of his long "extradition"

PA NEW OBSERVES

Results thus far in the campaign
for memberships in the Jameson
Memorial hospital Aide Society have
not filled the expectations of the or-
ganization. A membership costs so
little and does so much for those
who need the services of the hospi-
tal. Just now when the Jameson
Memorial is doing an unusual work
in an unusual period, when it is op-
erating at a cost that is considered
low, when it is filling such a vital
need in the community it does seem
that a membership drive such as the
one now in progress should meet
with a greater measure of success.

Forest Fires Are Causing Thousands Of Dollars Damage

At Least 40,000 Acres Of
Timberland Have Been
Burned In State

Thousands Of Men Fighting
Flames; CCC Recruits
Helping Out

(International News Service)
HARRISBURG, May 8.—
Carpeted with a thick deposit
of tinder-dry leaves, Pennsylvan-
ia's forests fell easy prey to
forest fires in the last 48 hours.
At least 40,000 acres of timber
were burned during that period, it
was estimated today by George H.
Wirt, chief of the state bureau of
forest protection.

Damage Is Heavy
The heaviest damage was inflicted
in Clearfield, Centre and Clinton
counties, Wirt said. He declined to
estimate the extent of the damage
because reports from district for-
esters were incomplete but said it
would total several thousand dollars.
Wirt declared that two of the
most serious fires were apparently
of incendiary origin. The most dis-
astrous, which burned 20,000 acres
of valuable hunting and fishing
land on Snowshoe mountain, Centre
county, was ignited simultaneously
in a number of places, he charged.
Another fire that burned more than

Expect RWD To Resume Friday

Projects Listed For Resump-
tion Are Announced
By Officials

ONLY CLASS A MEN ON JOBS

There seems little doubt that work
on RWD projects in Lawrence coun-
ty will start on Friday, May 11. As-
sistant Administrator Carl Leath-
ers stated today that he expected
to have authorization for the dis-
bursement of funds by that time,
project approvals have been re-
ceived and placements are expected
to be filled by that time.
The projects which will start on
Friday are Cunningham Park, Ray
Street Quarry, Croton Wall, Croton
Fence, Taylor Street, all school
projects, Oak Park Road, Gunton
Park, Hillside School, New Wil-
mington, Pulaski Township, Volant
School, Brent School, East Brook,
Union Township, Ellwood City,
Chewton, Enon Valley, Bessemer
and South New Castle Boro. In the
boros and townships only one pro-
ject in each is expected to start.

Only Class A
The total personnel will not ex-
ceed 1000 men and with the ex-
ception of administrative force, su-
pervisors, timekeepers and skilled la-
bor, only Class A men will be em-
ployed. This means that to be
working a man must have four
other dependents other than him-
self. This may mean a wife and
three children, or it may mean a
father, a mother and two brothers
and sisters.

A man with a wife and one child
can hardly hope to go to work under
the newest rules handed down by
the RWD. Basing the action on the
ground that the largest families
show the largest need, Class A is
the only class from which workers
will be picked. Inasmuch as there
are 3000 men in Class A, and only
1000 to be selected it is easily seen
that a man with a wife and one or
two children is not likely to be
called, for common labor at least.
All supervisors will report to the
office of the director in the Greer
building on Wednesday morning,
May 9 at 8 o'clock. This is for the
purpose of setting up the plan of
action for the various projects and
all supervisors must be present.

nounced today that the new truck

be put in service.

Barn Burns Near New Wilmington

(Special To The News)
NEW WILMINGTON, May 8.—On
Monday evening, about five o'clock,
the barn and another out building
belonging to Benjamin Yoder were
burned to the ground.
Mr. Yoder lives near the Amish
school house about three miles south
west of New Wilmington.
The New Wilmington Volunteer
Fire Company was called to the
scene and succeeded in saving the
house.
Flames from the fire started fires
in the near by fields and fences but
with the aid of many spectators
these were soon extinguished.
Mr. Yoder's loss was estimated
to be approximately \$1,000 with no
insurance.

New War Debt Agreements

WASHINGTON, May 8.—
The United States is through
accepting "token" pay-
ments from the European
debtor nations, it was learn-
ed today.

This government will de-
clare Great Britain, Italy
and the other former "token"
payers in default under the
Johnson Act the middle of
next month unless they meet
their unpaid obligations in
full or a new debt agreement
is reached in the meantime.
Both possibilities are considered
doubtful and indications are in-
creasing the United States will re-
ceive absolutely nothing from the
debtor nations with the exception
of the little republic of Finland,
which is expected to continue meet-
ing its obligations in full.

Foresee Official Announcement
Official announcement of the govern-
ment's view that under the
Johnson act it cannot continue to
accept token payments from the defaulting
class may be made within the next
few days.

This action is expected to ter-
minate the so-called "token" pay-
ments and bring all European debt
payments, with the exception of Fin-
land, to an end until a new agree-
ment is reached.
At the same time, reports were
current that the administration was
considering a new general debt re-
vision plan that would reduce
Europe's total debts to this govern-

District No. 33.
Outside the city's borders today

Robles Kidnaping Case Still Remains Unsolved

(International News Service)
TUCSON, Ariz., May 8.—Despite
disappointing forays into Mexico,
authorities today held the belief
that a solution was near in the case
of June Robles, 6-year-old heiress,
kidnaped two weeks ago for \$15,000
ransom.
Numerous fruitless expeditions
south of the international boundary
line served notice that the south-
west's greatest manhunt was in pro-
gress again and will be continued
without abatement until the case is
solved.
Chief Criminal Deputy Sheriff
Oliver White of Santa Cruz county
returned empty handed to Nogales
last night from a day's trip into
Mexico with several department of
justice agents. White had said Sun-
day that "June is alive," but hopes
for a speedy recovery of the little
girl, if she still is alive, were dashed
by announcement of other officers
who had gone into Mexico that they
were without any definite clues.
Silent On Mystery Trips
White refused to discuss yester-
day's mysterious excursion which
took him to several towns in Mexico.

COST OF RELIEF IN U.S. STILL HUGE

Hundred Million Dollars In Month

Data Being Collected For Purpose Of Making Future Plans

PUBLIC WORKS ARE BEING EXPANDED

(International News Service)
WASHINGTON, May 8.—Unemployment relief will cost \$100,000,000 this month Harry L. Hopkins, federal relief administrator, admitted today.

This is from ten to twenty million above previous estimates and is partly accounted for by delayed payments due in April for materials. The figure includes rural relief, payment to unemployed teachers on the educational program and all other relief costs. Neither Secretary of Interior Ickes or Hopkins are willing to forecast when the "break" will come in relief costs.

Ickes, as public works head, anticipated the peak of public works expenditures through actual contract work, will be reached in early summer.

Prepare Data on Needs
He has consistently refused to speculate on the number of wage earners gainfully employed through estimated expenditures of more than \$1,000,000,000 from the total of more than \$3,000,000,000 now allotted for public works. More than one-third of the \$3,000,000,000 is financing projects actually in the construction stage.

Hopkins professes not to know the actual number of families on relief at the moment.

"You can bet I'll have that information before I go up to the hill to talk on the pending new relief appropriation," he added.

His field agents are preparing this data, and also the anticipated relief needs.

Consider Pinchots Plea

As soon as Hopkins gets an accurate picture of the relief requirements of the country he will make a decision on the suggestion of Gov. Gifford Pinchot, of Pennsylvania, that the relief grants to the states be made over a several months period, instead of only for one month as at present.

Pinchot report his state has exhausted its relief funds and needs federal grants to care for its unemployed during the next eight months. Pennsylvania's allotment of about \$10,000,000 for May already has been forwarded to Harrisburg.

other than to say that no arrests had been made, and that he planned another trip south of the border today.

White is well acquainted with conditions on both sides of the border and has been working in close co-operation with authorities of Mexico and Arizona.

Joseph E. Dunn, chief agent of the department of justice in charge of the kidnapping investigation, said following the return of the party from Mexico.

"It was the best tip that has come out of the affair but after running down all angles it proved worthless."

One "hot tip" led to Cananea, Mex., following the statement of an ex-convict from San Quentin, Cal., prison that he had overheard in a pool room a conversation indicating June may have been taken to Cananea and hidden on an abandoned mining property.

He arrived Monday with Mrs. Mayhew and their daughter.

Promptly at 6, or shortly after, various club groups from out of town will assemble at The Castleton for club and inter-club dinners.

General Chairman McFate could not announce definitely what clubs would meet for special dinners today.

District Governor's Ball

Coming as one of the conference highlights is the Wednesday evening program, the colorful reception for honor guests and the district governor's ball which the New Castle club sponsors. A popular district orchestra has been engaged to play for it at the Cathedral. International Director and Mrs. Mayhew and District Governor and Mrs. Beeler will be the honor guests. Cards, dancing and special entertainment will feature.

At the Thursday morning assembly in the Cathedral, opening at 9 o'clock, the official welcome to the conference delegates on behalf of the New Castle club and the city's officialdom will be offered. All morning will be devoted to opening routine and regular business with adjournment for a luncheon program at noon.

More separate conferences for club committees will come Thursday afternoon, a district banquet that night and more conference programs on Friday.

Plan Entertainment

So that the visiting delegations may enjoy the fires to the full during their stay here arrangements have been completed for golf tour-

naments at the New Castle Field club and for special entertainment for the ladies at various places. Mrs. Carl E. Paisley heads the able ladies' convention organization.

Final adjournment of the sessions, according to the conference schedule, will come at 4:10 on Friday afternoon.

Working diligently for weeks to make ready the arrangements for the Rotary through have been a group of local Rotary committees which, with General Chairman McFate at the helm, have performed a notable service in planning the convention. They will continue to function throughout the stay of the visitors.

"TWO YARD SHANNON"

Military service alone is not qualification enough for public office. But where a candidate possesses the qualifications necessary to the office, then the fact that he served his country honorably in time of war cannot but be an additional reason why he should be elected.

The "Shannon-for-Governor" committee is not advancing the name of Edward C. Shannon as the logical candidate for the Republican nomination for governor on his war record alone. They point to his record as a business executive for 47 years, during which time he never had a strike, a walkout, or any kind of labor trouble in his plant. They point to his record as Lieutenant-Governor, a record that has never been equalled in the state. They point to the fact that he has been singled out by the overlords of the Republican party as the one man that must be defeated if a controlled governor is to be elected.

And finally, they point to the fact that when Uncle Sam was looking for "fearless fighters," Edward C. Shannon was in the front line. Not for nothing did he win the title "Two Yard" Shannon. He won it because he was two yards ahead of his infantrymen in every advance along the Western Front, in 1918. Shannon helped to break the Hindenburg Line.

Let's help him to break the Vire line.

General Chairman.

STATUS OF DEFAULTER NATIONS FIXED

THE Johnson act, making it illegal for any private person or corporation to have financial dealings with any foreign government in default in its payments of obligations to the government of the United States, is so sweeping in its implications that the state department has obtained from the attorney general a ruling on the somewhat perplexing questions raised by it. While the issue is not wholly cleared by Mr. Cumming's statement, certain broad considerations may be regarded as settled.

The opinion that token payments relieve the countries making them from the charge of default is cited as placing Great Britain, Italy and five other nations in a different category from the rest and leaves them up to the present in good standing, though whether further token payments can be accepted under the act is apparently a matter of doubt. But ordinary commercial paper is exempt; so are bonds of solvent foreign cities and public corporations created by the act of congress or where the government exercises a controlling interest. Thus the question is in effect confined to the war debts. France leads the list of the nations in default.

Of immediate interest is the effect upon the financial dealings with Russia contemplated after diplomatic recognition. No exception is made in the case of the Soviet government, which the attorney general holds responsible for the debts of the Kerensky regime. This is logical enough. But it seems to make impossible for the present the trade relations which recognition was expected to stimulate.

The ruling brings France, in particular, sharply face to face with the consequences of entirely ignoring her obligations. If the bill is strictly interpreted, even token payments will now be barred. M. Herriot and others have recently endeavored without success to change the government policy. There are intimations that Paris is ready to reconsider the argument that nothing can be done until there is a final adjustment. It would clearly have been much better if she had followed the British example.

DANGER IN PICKING UP HITCH-HIKERS

With the army of hitch-hikers steadily increasing as warm weather nears motorists are warned by the Pennsylvania Motor Federation, to use caution in giving rides to strangers. The federation points out that ride soliciting by pedestrians on Pennsylvania highways is illegal under an act passed by the legislature in 1931. This is quoted as follows:

It shall be unlawful for any person to stand on the main traveled portion of any street or highway for the purpose of soliciting a ride from the driver of any vehicle. Penalty—a fine of \$2 and costs of prosecution, and, in default of the payment thereof, imprisonment of not more than one day.

A survey of hitch-hiker conditions in Pennsylvania has revealed, according to the P. M. F., that many of those soliciting rides are traveling from place to place seeking employment, but that among these are certain of the criminal element who take advantage of this practice to carry out their depredations.

"While the motorist naturally wants to do all he can to help along the worthy individual, he must safeguard himself against the criminal," said S. Edward Gable, president of the federation, "and it usually is difficult to know where to draw the line. Many firms operating trucks have forbidden drivers to give rides to anyone, and commercial travelers frequently are warned by their companies to beware of the hitch-hiker."

"In view of the unusually large number of people traveling from place to place these days the railroads are patrolling their lines more carefully than ever, and thereby give less opportunity to 'ride the rods.' This has driven many undesirable to the highways, and has added to the dangers of giving lifts to the wayside traveler."

NEXT SUNDAY IS MOTHER'S DAY

In accordance with a national custom just 20 years old, Sunday, May 13, will be observed as Mother's Day throughout the United States, in response to a proclamation by the president, who annually designates the second Sunday in May as a day of homage to motherhood.

The day had been observed in some cities as early as 1910, the idea having been originated by Miss Anna Jarvis of Philadelphia, and the custom spread rapidly. National recognition was given in 1914, when congress authorized the president to designate the second Sunday in May of each year as Mother's Day, and the first proclamation under this authority was issued by President Wilson the same year.

The object of the day, as is well known, is to recall memories of the mothers who have passed away, and to pay special tributes of affection to those living. The badge for the day is the white carnation, emblematic of the purity, beauty and fidelity of a mother's love. By some the red carnation is worn in honor of living mothers.

Few of us reflect as often as we should on the debt of love and gratitude we owe to our mothers. By thoughts and acts of sincere affection on Mother's Day, and on other days as well, we honor them and do credit to ourselves.

DRAMATIZING APPEAL GETS RESULTS

A 17-year-old girl was taken to a New York hospital suffering from a rare blood disease. Only a number of blood transfusions could save her life; she did not have the money to pay for them, and the hospital was operating on too limited a budget to buy them for her.

So an appeal was made to the public, announcing that the girl must die unless volunteers came forward to give her their blood. And within a few days more than 400 people went to the hospital and offered to submit to the transfusions.

As a demonstration of the way in which human sympathy will respond to an appeal for help, this is an encouraging case. But it also demonstrates that a human need often must be dramatized if we are to relieve it.

There is a vast store of kindness and self-sacrifice in this world; but it sometimes takes a dramatic situation to tap it effectively.

MAKE YOUR SYMPATHY VISITS SHORT

When you call on a person who is ill, make your visit short. To engage such a person in conversation is tiring and may excite him to a harmful, nervous condition. Rest periods should not be disturbed in any way.

Hospitals protect their patients against prolonged visits.

But in a home the family are reluctant about telling a caller that he should depart.

Your presence may have a cheering effect upon a patient but it is easy to be too attentive.

When a person is seriously ill you should not expect to see him.

Even though you are quiet your presence may be harmful.

Too often neighbors and friends rush to the home of one who is ill or who has met with an accident. The one who is suffering does not want anyone but his immediate family about him.

There are other ways of showing your interest and sympathy for a stricken one besides calling or telephoning to the home.

TRINKETS
Bits of silverware shining bright,
Plates and saucers and cups aglow,
Standing on edge like a child tip-toe,
Silent symbols of pure delight.
A patch of ground where the lark-spurs grow,
These we cherish as time takes flight.

These, the trinkets of all our years:
A shelf of books and an easy chair;
Priceless tokens of friendship rare;
Walls where many a print appears
Of sticky fingers that rested there
And tiny treasures that start the tears.

Time enriches the things we keep.
Values change as the swift years fly—
Memory sweetens the bitter sigh.
Nor all the gold in a mountain heap
Could replace the tokens of joys gone by
And the cherished trinkets o'er which we weep.

Hay Fever
Club

(International News Service)
PHILADELPHIA, May 8.—At last—a club where hay fever sufferers may feel at home.

F. M. Berle, who has sneezed his way through May and June for the last five years is the man who proposes the "Hay Fever Social Club."

"There are thousands of hay fever sufferers in Philadelphia, who are very sensitive about it, and feel as though they were social outcasts," he said. "During my sneezing periods I consider myself a social outcast and will not accept invitations—except from hay fever victims."

Berle said he and a few friends who suffer from that ailment spend a great deal of time together, and also remarked that there must be other young persons who suffer from hay fever and would like to do pleasant things and have nice times but cannot do so because they feel that they are "unwanted company."

BALLAD

In the summer even,
While yet the dew was hoar,
I went plucking purple pansies,
Till my love should come to shore.
The fishing-lights their dances
Were keeping out at sea,
And come, I sung, my true love!
Come hasten home to me!

But the sea, it fell a-moaning,
And the white gulls rocked thereon;
And the young moon dropped from heaven,
And the lights hid one by one.
All silently their glances
Slipped down the cruel sea,
And wait! cried the night and wind
And storm—

Wait, till I come to thee!

Rails Could Save By Buying
But Still They Hold Back
Steel Peak Higher Than Expected

By LESLIE EICHEL

Central Press Staff Writer

NEW YORK, May 8.—Take the case of the railroads, once more. With modernized motive equipment they could reduce their costs greatly.

The government is willing to lend the money. But managements seem to be living in a past age.

Electrification is of course impossible under present economic conditions, except in the case of very dense traffic.

A Pennsylvania railroad man, discussing electrification with me, said operating costs with electrification were even lower than had been estimated.

The modernized steam locomotive, which a few roads now are buying, is likely to prove equally efficient, where traffic does not warrant electrification.

RAIL BUYING

A hullabaloo has been made over the amount of railroad buying. As a matter of fact, even in the widely-heralded rail purchases (with government money) the orders are only a fourth of purchases in "normal" years.

STEEL PEAK

Wall Street looks for steel operations to continue rising for a while yet.

The peak will be higher than had been predicted a few months back.

Youngstown is expected to reach or better a four-year high of 67 per cent within five or six weeks.

PESSIMISM

Speaking of Wall Street, a customers' man in a big brokerage house voiced to me a general feeling there:

"There is no business in the street. There is fright. It's more than that stock regulation bill. It is fear that President Roosevelt will take from those that have for those that haven't."

NAZI-DOM

Yesterday we had the view of a German woman concerning Germany.

Today we have the view of a refugee German professor, who came to the United States with his wife and two children, leaving \$150,000 in property behind.

Says Dr. Paul Kimmelsiel, a professor of pathology:

"For a Jewish professor, it is better to be in the United States with 10,000 marks (\$400), which he had on his person, than to be in Germany with hundreds of thousands of dollars. And I fear that things will not change much. There has been much talk of an end to persecution, but it is not so.

"On April 1 all of the non-Aryan blood were expelled from Hamburg university. No one with more than 25 per cent of Jewish blood can be there now. Legally, Jews with war service are excepted. In reality they also must go."

SOMETHING NEW

Just as I have finished writing how railroads could save money by spending money to modernize motive power, along comes this word from Washington:

TODAY Is The Day
By CLARK KINNAIRD Copyright 1934 Central Press

TUESDAY, MAY 8

History's Memorable Days May 8, 1429—General Jeanne Darc, 17-years-old, commander of the French forces forced the English invaders to raise the siege of Orleans, and became the heroine of the French.

In May of the next year the French were to betray her to the English and cause her to be burned at stake.

Down through history the date of St. Joan's great victory was to be day associated with notable battles and soldiers.

May 8, 1806—America's first multimillionaire, Robert Morris, died a bankrupt at 72, unloved and un-

sung in the land he had done as much as man to make free.

As financier of the American Revolution, he put up \$1,500,000 of his fortune and pledged many of his lands, which were the most expensive holdings in the infant republic, for loans. Without these funds, the Continental Army might have starved.

Years later the republic had an opportunity to display its gratitude. He was jailed for non-payment of debts. He had been in prison three years an act of Congress, enabling him to repudiate his debts, got him out.

Weekly Health Talk

"Ten thousand mothers sacrificed annually is a fearful price to pay for the perpetuation of the race in the United States. Nevertheless, the sad fact remains that of the sixteen thousand women who annually die because of childbirth in this country, ten thousand needlessly succumb" states Dr. Theodore B. Appel, state Secretary of Health.

"In Pennsylvania alone in 1933, 784 mothers were lost. The maternal death rate for the United States is 6.6. In certain localities where efforts were concentrated to offer the best of care this rate has been reduced as low as 2.2. Obviously, there is a slip-up somewhere."

A survey in a large American city conducted under the authority of the local Academy of Medicine showed that 65.8 percent of the deaths were preventable. Any group of fatalities in which two thirds of the total could have been prevented represents a pressing problem. No one can deny this fact.

"It is therefore earnestly suggested that a vital service to communities can be rendered through committees making a comprehensive study of the local maternity facilities. In fact, until such an investigation is made there is now way of knowing whether the care offered mothers is adequate or otherwise. Such a committee should include a local obstetrician, representatives

from hospitals, service clubs and other important groups. It should work with the local medical society.

"If the investigations indicate that resources are meagre a distinct challenge will immediately arise in the locality involved. Good care should be within the reach of every mother in the Commonwealth. Definitely it is not too much to demand. The medical profession and the citizens have a joint responsibility in this matter."

"It is also extremely essential that prospective parents realize the necessity of pre-natal care. The mother-to-be should be under the supervision of her family physician from the moment the pregnancy of the prospective event is established. Unfortunately, many Pennsylvania mothers are deprived of this supervisory service, which, in itself, can detract many of the conditions now taking life in childbirth."

"Motherhood, the most sacred and vital of human functions, deserves more adequate facilities and attention than it is now receiving. The thousands preventable deaths must be markedly diminished and eventually eliminated. However, better appreciation of the problem and definite remedial action will be required before this much to be desired object can be achieved. Make Mother's Day, nationally celebrated on May 13th, mean a better chance for Mothers everywhere."

Hundred Scout Leaders Coming This Week-End

Girl Scout Troop Leaders
From Many Cities To Take
Camp Training

CAMP PHILLIPS TO HOUSE DELEGATES

Close to 100 Girl Scout troop leaders and their instructors, coming from cities in the western end of Girl Scout region three, will have a grand round-up on Friday afternoon of this week at Camp John M. Phillips, Kennedy's Mills, and will spend the week-end there taking a regional camp training course.

About 85 of the young women will be troop leaders, who will be in charge of various activities in their own Girl Scout camps this summer. They will come here from Erie, Altoona, Sharon, New Kensington, other nearby places, and from as far away as Cumberland, Md.

National Officers Coming
In addition to the troop captains and lieutenants, there will be Miss Jeanne Christy of the Girl Scout national staff, New York City, in charge of the week-end of training; Miss Margaret Ickes of New York City, also of the national staff; Mrs. M. Rodd of Cumberland, Md., who will be in charge of the pioneer work; Miss Isabel Hartwick of Pittsburgh, who will be in charge of dramatics; Miss Helen Thomas of Sharon, in charge of handicraft, and a number of assistants from New Castle and nearby.

Only about four New Castle leaders are enrolled in the course, since most are planning to take the two weeks leaders' training at Pine Grove and Camp Andre later. The New Castle Girl Scout council is co-operating with Miss Christy in making the arrangements, however, and several members will lend their assistance through the week-end. Mrs. Andrew Dodds will be in charge of the camp store while Miss Regina Popp and Miss

Elizabeth Reis will be in charge of the beginners' pioneer work.

To Train Councillors

The aim of the course is to train Girl Scout councillors, captains and lieutenants in camp-craft so that they may get the best possible results this summer when they have charge of their own camps.

Miss Christy, who was once a Girl Scout, had as her first official position that of field captain in Pittsburgh. Later she directed the Pittsburgh camp, "Red Wing", and became an authority on camping, particularly of the primitive variety. She likes to take a troop off for a two weeks trip and set up her own camp after the manner of the pioneers. Miss Christy became a member of the national camp advisory staff of the Girl Scouts in 1930. She was in New Castle less than a month ago, in charge of a leaders' and councillors' round table. The week-end of training will open with supper Friday evening and close on Sunday afternoon. Several members of the local council are going out to the camp today to prepare the camp for receiving the large delegation.

Ministers Plan Summer Services

Evening Services Through The Summer Will Be In Open At Cascade Park

A large attendance of the ministers of the city marked the meeting of the New Castle Ministerial Association in the First Presbyterian church Monday morning when Rev. W. E. Hammaker, D. D. pastor of the Trinity Methodist Episcopal church of Youngstown, Ohio was the speaker.

His brilliant address on "Rethinking Missions" provoked an excellent discussion by the ministers. Plans were made for conducting evening services on the Sundays of the summer at Cascade park, with the various ministers taking charge of the several services.

Rev. P. C. Pearson, pastor of the Trinity Episcopal church, gave a report of the book committee and Sunday, May 13, a list of books will be given the congregations, which are approved by the ministers and which will afford interesting reading during the summer months.

Contract Let For Building Spans At East Brady, Pa.

Buffalo Concern Given Contract For Two Spans, Washed Away By Recent Flood

(International News Service)

HARRISBURG, May 8. — The Lackawanna Steel Construction Corporation of Buffalo was awarded a contract by the State Highway Department to replace two spans of the East Brady bridge, which were washed away by heavy floods and ice.

The contract price was \$38,981.35. The bridge links the important Pittsburgh-Bradford-Buffalo highway route 68, and since the bridge was partially destroyed traffic has been forced to detour 60 miles by way of Kittanning.

The work will start at once. Eventually plans call for replacement of the old spans of the present bridge which are still intact and completion of a new bridge. The two spans to be installed under the present contract will be of a new type which can easily be linked later.

Three other contracts for construction totaling 12.82 miles also were awarded today.

AROUND CITY HALL

Police chronology for 24 hours ending at 3:30 p. m. May 7: nine arrests on charges as follows: drunkenness 5 and drunkenness and suspicion 4.

Council has indicated it will formally accept Cascade park from the Pennsylvania Power company by reporting from committee with a favorable report a bill conveying the park to the city. The cost will be \$1. An official deed has been received by Solicitor R. M. White.

The warm weather having arrived it is probable that city officials will soon listen to the plea of the tennis players. So far no move has been made toward putting various tennis courts in condition for play this summer.

It is quite obvious that several of the boys who have a habit of being regular members of the police court class on charges of intoxication have formed a liking for castor oil. However, several who have not yet gained that category have taken the warning to heart and stayed out of court.

Records of the public library show more books dealing with fiction are loaned. More than 3,500 books were worn out and discarded, about 500 lost in circulation and 1,223 missing when the inventory was taken. A total of 351,175 books were in circulation here during 1933.

According to police court hearings most of the people who are involved in cutting scrapes wield small razor blades. Apparently stoppage of CWA and RWD work here has stalled the proposed police radio construction. Streets sweepers will operate one minute past midnight tonight until 6 a. m. Wednesday.

Frank Nugent, superintendent of the city disposal plant grounds, has announced he is ready to allot lots for garden purposes. Those who had them last summer can sign up for the lots. According to the agreement any person caught appropriating green stuff from anyone else's lot automatically loses their ground.

New Claims Not Needed By Vets Of Spanish War

Most Of Veterans Have Received Notification From Vets Administration

Word has been received by Secretary Orville Potter of the Lawrence county chapter, American Red Cross, that new claims are not needed in the restoration to the roll of Spanish war veterans or their widows, under public Act No. 141.

Most veterans have by this time been notified by the veterans administration, advising them of this fact and asking them not to correspond with the administration for a period of at least 60 days, in order that the department may catch up on the work necessary in the restoration of pensions.

Chamber Of Commerce Prepares For Expansion Of Activities For City

With the looming of better business conditions the Board of Directors of the New Castle Chamber of Commerce is getting ready for an expansion of activities. To this end, a questionnaire of some considerable length has been mailed to the business and professional leaders of New Castle enlisting their aid in developing the proposed program of the Chamber of Commerce for the ensuing months. This questionnaire covers a wide range of suggested activities it being the purpose of this referendum, it was said by Chamber officials to determine exactly what the leading minds of New Castle believe to be the most important activities. These questionnaires have been mailed with a business reply envelope enclosed which requires no postage by the sender so that no expense is incurred by her opinion of what constitutes the most important activities in the further development of New Castle. The subjects covered in the questionnaire are listed under the general heads of civic activities, industrial development, mercantile activities, political activities, transportation problems, housing taxation, educational agricultural, community advertising and convention development. Under each of these suggested projects, it is the desire of the Board of Directors of the Chamber of Commerce that the recipient number in the order of importance attached to each suggested project, 1, 2, 3 etc so that at the completion of the referendum, a recapitulation will clearly indicate those projects demanding preferred positions in the next year's program. This action by the New Castle Chamber of Commerce is in line with the renewed activities by Chambers of Commerce in various industrial cities of the country and is in itself indicative of a more general return of confidence on the part of business. The public, it was said, will be taken into complete confidence of the Chamber in the publication of the final returns on the referendum now under way.

(International News Service) PITTSBURGH, May 8.—Schenley Park's "petters" displayed a smile of satisfaction today because they are going to get back their benches. Get the Habit of Drinking Hot Water Before Breakfast

Says we can't look or feel right with the system full of poisons.

Millions of folks bathe internally now instead of loading their system with drugs. "What's an inside bath?" you say. Well, it is guaranteed to perform miracles if you could believe these hot water enthusiasts. There are vast numbers of men and women who, immediately upon arising in the morning, drink a glass of real hot water with a teaspoonful of limestone phosphate in it. This is a very excellent health measure. It is intended to flush the stomach, liver, kidneys and the thirty feet of intestines of the previous day's waste, sour bile and indigestible material. Over in the body which if not eliminated every day, become food for the millions of bacteria which infect the bowels, the quick result is poisons and toxins which are then absorbed into the blood causing headache, bilious attacks, foul breath, bad taste, colds, stomach trouble, kidney misery, sleeplessness, impure blood and all sorts of ailments. People who feel good one day and badly the next, but who simply can't get feeling right are urged to obtain a quarter pound of limestone phosphate at the drug store. This will cost very little but is sufficient to make anyone a real crank on the subject of internal sanitation. Just as soap and hot water act on the skin, cleansing, sweetening and freshening, so limestone phosphate and hot water act on the stomach, liver, kidneys and bowels. It is vastly more important to bathe the inside than on the outside, because the skin pores do not absorb impurities into the blood, while the bowel pores do.

"ALL-BRAN WILL ALWAYS BE A PART OF MY DIET"

Delicious Cereal Corrected His Constipation

If you suffer from constipation, read this fine letter:
"I have been troubled for years with constipation. During this time, I have tried almost every known remedy. Then some one recommended eating Kellogg's ALL-BRAN, and the proper results followed immediately.
"Since eating Kellogg's ALL-BRAN each morning, there has been a general improvement in my health without the ill effects that I formerly experienced when taking laxatives. Hereafter, Kellogg's ALL-BRAN will always be a part of my diet."—Mr. E. G. Himes, 1201 E. 7th St., Los Angeles, Calif.
Research shows Kellogg's ALL-BRAN provides "bulk" to exercise the intestines, and vitamin B to aid elimination. ALL-BRAN also supplies iron for the blood.
The "bulk" in ALL-BRAN is much like that in leafy vegetables. Isn't this "cereal way" safer than risking patent medicines?
Two tablespoonfuls daily are usually sufficient to relieve ordinary constipation. With each meal, in serious cases. If not relieved this way, see your doctor.
Be sure to ask for Kellogg's ALL-BRAN. It contains much more needed "bulk" than part bran products. In the red and green package. Made by Kellogg in Battle Creek.

Milk Producers Of Western Part Of State To Meet

Milk Marketing Committee For
Producers Of 19 Coun-
ties To Be Chosen

HARRISBURG, Pa., May 8.—Robert L. Cocklin, representing the Pennsylvania Milk Control board, has called a meeting of all milk producers supplying the Pittsburgh market Wednesday morning, May 9, at 9:30 o'clock in the Fort Pitt hotel, Pittsburgh.

The meeting is one of two called for the purpose of naming a Milk Marketing committee for the Pittsburgh area, the committee to be formed of three producers and two distributors or dealers.

Such organizations are being established in the leading market centers of the state, three such having already been formed. The first was at Harrisburg and proved so successful in securing co-operation between producers and distributors, looking to ultimate stabilization of the market that the Milk Control board has decided to make it effective throughout the state.

Milk producers in approximately 20 counties will be represented by the members of the board and it is desired that the meeting Wednesday in Pittsburgh be as representative as possible.

Producers from Allegheny, Washington, Westmoreland, Butler, Armstrong, Beaver, Indiana, Lawrence, Mercer, Crawford, Fayette, Greene, Somerset, Bedford, Cambria, Clarion, Jefferson, Forest and Venango counties are expected at the meeting which promises to be as large, if not larger, than those in attendance at the various code meetings held for the Pittsburgh market.

A meeting of fluid milk dealers in the counties has also been called for the same day at the Fort Pitt hotel but it will be held in the evening at 8 o'clock, daylight savings time, following the meeting of the producers.

FRANCE DESIRES SETTLEMENT ON WAR DEBT TO U.S.

Negotiations Are Reported

Official Denial Is Regarded
As Formal Gesture By
Governments

FRANCE WANTS TO JOIN TOKEN PAYERS

By WILLIAM PARKER
International News Service Staff
Correspondent

News Service

PARIS, May 8.—France is seeking a settlement of her debt to the United States.

Active conversations between Premier Gaston Doumergue and President Roosevelt, are going on through diplomatic channels with eventual settlement of the perplexing debt question in view.

International News Service learned this today from a source so close to the French government that any official denial in Paris or Washington may be viewed as merely a formal gesture.

One of the difficult points at issue is whether the United States congress can be brought into line to accept an agreement if one is reached in accordance with French desires.

Seeks To Make Token Payments

Premier Doumergue, it was learned, wants from President Roosevelt, an assurance that congress will agree that France is no longer in default on her debts if she makes token payments similar to those made by Great Britain. If congress will accept this arrangement, and it is held to be legal under the terms of the Johnson bill recently enacted by the American legislature Doumergue is prepared, it was declared here, to seek necessary authorization from the Chamber of Deputies to make the payments.

What the French government apparently wants to do, is make full payment of her December, 1932 installment and token payments on the installments due in June and December 1933, as Great Britain did. Due to the depreciation of the dollar, France could make these payments for \$40,000,000.

This would put France in the same position as Great Britain, which already has been ruled not in default. The finance commission of the Chamber of Deputies, which caused the fall of the government of former Premier Edouard Herriot because Herriot wanted to pay the United States, is now reported to have changed its attitude. If an understanding is reached that token payments would wipe out the stigma of being a debt defaulter, the commission is willing to approve the payments.

profitable in itself, is mainly a smoke screen for bootlegging "drugs and illegal immigrants."

The liquor pilot who does not supply his own plane gets twenty dollars for a two-and-a-half hour round trip. He brings in 20 bags of liquor, 240 bottles each trip, and makes an average of about sixty dollars a day.

If he supplies his own plane and gas, he gets a hundred dollars for a round trip.

WHEN ONE pilot brings drugs, he flies low over a field indicated in advance, drops a small package and flies on. When he brings "bootleg immigrants" that pay two hundred and fifty dollars each for Europeans, one thousand dollars for each Chinese, he lands as soon as possible, transfers his "cargo" to another plane, which lands them in the center of some other state, far from any coastguard or customs house, where the "individual" can lose himself in the crowd. Many fugitives from Germany are now gathered on British West Indian islands, waiting for bootleg transportation, only a hard heart would have them turned back.

THE BIG DIRIGIBLE Macon is off with the war fliers "secretly." Mr. H. Bond Bliss, Colonel F. B. Shuts, young editorial genius, says it is like sending an elephant "secretly" into a chicken yard.

To send a dirigible flying as regular part of an air fleet in war would be to invite destruction. The big silver ship, invisible at a short distance, should be kept apart used to attack cities, with heavy loads of bombs and poison gas, vomiting out small, swift planes from its interior to reconnoitre, attack and destroy, as the horrible hag at the gate of Milton's hell sent out her howling brood.

As well send a milk cow into a dog fight as send a dirigible among regular fighting planes. One well-aimed explosive shell and no more dirigible.

IN SAPULPA, Oklahoma, the father of eight children tried to poison them all, his wife and himself, but lacked money to buy enough strychnine. They all took the poison, only three children died. When caught, the father, who had only five cents, asked the police to shoot him saying:

"You don't know what it means to have children so young you can't explain things to them when they ask for food."

There are some depths, apparently, that good intentions have not reached.

Jameson Hospital Aide Society Does Real Work

The Jameson Memorial Hospital Aide Society is not just a social sewing circle which meets at the hospital on Wednesday mornings to do the hospital mending. It is a real production organization.

27,178 items of linen supply—that is the total contribution our organization has made to our hospital in four and a half years—27,178 pieces of new linen supply. We have stated that this is divided among fifty odd items. Exactly, there are 67 items of linen supply. Here are just ten items:

1333	Bed sheets
557	Bed spreads
1536	Pillow slips
3562	Operating room towels
1464	Face towels
772	Bath towels
981	Diapers
1030	Tray covers
3405	Pack covers
670	Dresser covers

We'll not hang all these 27,178 pieces on a theoretical clothes line and measure it and we'll not estimate how many layers these 27,178 pieces would make when all used to cover the Washington Monument—but we take a little pride in the fact that our efforts count up to something pretty real in the way of practical aid in care of the sick. Some of us have suffered hospital confining illness and have enjoyed the use of the very linen supply we helped to furnish. Any of us may unexpectedly need our hospital. We shall find it ready. For our part we are seeing to it that the linen supply is adequate. The need is nearly 40% greater this year than last. We are better able this year to provide this increased supply—but we need the considerable help of more members and larger contributions. Make it your business to take part. If we have missed you call the hospital—6000—and leave the message that you have escaped our canvass.

By ARTHUR BRISBANE

SIXTY THOUSAND human beings went to see the derby run in Kentucky, roared, cheered, enjoyed themselves. That means sixty thousand chances for somebody else to get ahead in the world. The turtle won his race while the hare was asleep. Many "dull, plodding" young men have won their race while "bright boys" were at the race track.

SOME, TOO old-fashioned perhaps, will welcome a suggestion from Washington that the President plans to let the country "run itself" for awhile, and take "a rest cure" after Congress adjourns.

The old-fashioned recall that the country has run itself for some time, ever since 1776; in fact, during that time, we have had our worries, strikes, panics, troubles of various kinds, but we have also had PROGRESS.

NEW YORK has changed from a small town near the Battery to the greatest city in the world.

Chicago has risen from a mud-flat, Los Angeles from a strip of land mixed with boulders and dry rivers. San Francisco has risen with the magnificent golden gate as a front door and across the bay the great city of Oakland.

All the way from Seattle to Miami, from the northeastern tip of Maine to San Diego, the United States, "running itself," had done, on the whole, very well.

It might do better, it could and it should do better perhaps, but it has done pretty well. Above all, it has done it without any permanent classes of poor and rich, nothing like the Asiatic caste system, or any government against which the masses fear to protest.

THE ASTORS had nothing when George Washington was the richest man in the country; the Astors in the regular course of nature, will have nothing when somebody as yet unborn will come from some farm to be the country's richest man.

Everything should be tried, and everything is being tried, heaven knows. Letting the country run itself again is one of the things that might be tried advantageously for a while, not dropping any of the new good ideas, of course.

IT MAY INTEREST the government to learn that bootlegging by airplane, bringing alcoholic drinks from British West Indian islands to Florida and other states, while fairly

Employees And Families Have Dance In Cafeteria Of Company Building

Over 100 couples enjoyed the annual May party for employees of the American Can Company Friday evening, and agreed that it was the most delightful of all the previous affairs. The cafeteria of the company building was arranged in gala fashion and the crowd of guests danced to the rhythmic tunes of a six piece orchestra.

The party got underway at about 8:30 p. m. and lasted to the early hours of the morning. Much credit for the great success of the evening goes to the committee in charge comprised of K. B. Norris, William Schoenfeld and Harry Pearce.

come tax payments for the year 1931.

The first was a loss on the sale of stock of the Pittsburgh Coal Company (an ordinary loss of \$5,766.30 and a capital loss of \$5,672,189.75) and the second, a loss on the sale of stock of the Western Fuel Service Company (an ordinary loss of \$49,500 and a capital loss of \$352,500).

Capital losses are taken on stock held over two years and ordinary losses on stock held less than two years.

Sustain Mellon.

The jury's decision substantiated Mellon's claim that he was innocent of any attempt to evade income tax payments, the investigation of which was ordered by Attorney General Homer S. Cummings last March. Claiming that he was entitled to a refund on taxes already paid, Mellon previously termed the proceedings an attempt to "railroad" him before a grand jury.

The jury investigated charges made by Cummings that Mellon's net income for the year 1931 was \$767,173.73 upon which a tax of \$1,363,703.63 should have been paid. Mellon's income tax report for that year showed a net income of \$5,552,874.56 and he paid a tax of \$647,559.36. The government charged he evaded a tax of \$716,144.27 during that period but the jury's findings did not uphold this contention.

Hear Five Witnesses.

After hearing five witnesses—three federal officials and two representatives of the famous industrialist—the jurors discontinued interrogations and went into deliberations on the case yesterday afternoon. Within an hour, they were reported to have reached a decision but were unable to make known their findings because all judges had gone home for the day.

When the deliberators entered the court room of Judge R. M. Gibson today, the jurist asked:

"Do you have any return to make?"

The foreman of the jury, William Boe-on, Uniontown bank clerk, replied:

"We have."

He then handed the bill, marked "not a true bill" to the clerk, Judge Gibson, noting the finding, returned the bill to the clerk with instructions to have it filed while he crowd of interested spectators speculated on the decision. As soon as the bill was filed, the word that Mellon was completely exonerated spread rapidly.

(International News Service)

Mellon Gratified.

Pittsburgh, May 8.—Andrew W. Mellon, 79-year-old former secretary of the U. S. treasury, expressed gratification when asked to comment on his exoneration of violations of the income tax laws by a federal grand jury here today.

"I am, of course, gratified that I have been exonerated by a jury of my fellow-citizens," Mellon said. "The fact that the grand jury reached a sound conclusion notwithstanding the unusual methods pursued in my case, is proof of the good sense and fairness of the American people."

Would Limit Tariff Powers For President

Republicans Would Confine
President's Tariff Making
Power To Free List

By WILLIAM K. HUTCHINSON
International News Service Staff
Correspondent

WASHINGTON, May 8.—A proposal to limit President Roosevelt's requested reciprocal tariff powers over imports to articles now on the free list was presented today to a conference of Republican senators as a substitute for all other attacks on the administration bill.

This plan would strip from the president of all power to change tariff rates on dutiable articles. It however would give him the annual American market for about \$1,000,000,000 worth of duty-free articles with which to go shopping for trade among the other nations.

Duty free imports in 1932 fell to \$890,068,000, while the taxable articles imported totaled but \$440,165,000. The imports of duty free articles in 1931 were \$1,396,616,000, in 1930 \$2,086,923,000 and in 1928, \$2,678,633,000. In all these years, the dutiable imports ranged from 50 to 60 per cent of the duty-free imports.

A broad list of articles are on the duty-free list. The new plan would give the president authority to negotiate treaties for this billion-dollar American market. He would have power to admit these duty-free articles from any nation, agreeing to purchase desired amounts of American surplus commodities. The duty-free market would be closed to nations, which refused to enter such treaties, through imposition of simple compensatory duties.

Democratic leaders were expected to fight the substitute, since the president desires power to raise or lower rates on dutiable imports 50 percent. If the Republicans endorse it at their conference they will draw some support from those Democrats who secured duties two years ago on a number of articles, such as lumber, oil and copper.

NEW YORK, May 8.—The Whitney won't like it, because with their racing background—nowadays it seems to be all back—they're a little perplexed and grieved by the nouveau of the turf who do, in a year or two, what many a Whitney didn't in the last thirty. It, therefore, will interest some people pleasantly and others a little poignantly that Mrs. Isabel Dodge Sloane and her trainer, Bob Smith, have decided upon a bold course with their pair of star three-year-olds.

One of them, Cavalcade, winner of the Kentucky Derby, is to be sent out to dominate the west; the other, High Quest, will be given the eastern territory, much as a sales manager might decide to reward a young and promising staff member. And between them, they may run up a total of \$300,000 before the close of the racing year.

Cavalcade To Race.
Cavalcade, for instance, will go in the American Derby at Chicago in early June, the Detroit Derby in late June, the Arlington classic and the Lantonia championship. They expect him to gross better than \$200,000 which, at the present rate of exchange, compares pretty favorably with Gallant Fox's one-year record of \$300,000 and the \$376,000 lifetime showing of Sun Beau.

High Quest will start in the Preakness on Saturday at Pimlico where he figures to be the favorite; the rich and traditionally important Belmont and the stake races at Saratoga. They look for him to do at least \$100,000.

Just For Fun.
Actually, of course, the money does not figure at all urgently in the plan, except as a symbol of success. Mrs. Sloane is the lady who decided to amuse herself by spending a little of the Dodge fortune on a racing stable and now winds up with a business on which the bookkeeping alone will be no minor matter. Besides, if it was only a money record she sought, there is no possibility of approaching the Gallant Fox performance, current purses being what they are.

Instead, a far more imaginative and original course has been conceived. A champion for each section. Why, the first thing you know, they'll be playing it off as a world series.

By the time they get through college they know almost everything except how to pass a 5th grade examination.

Will Cut Passes To Local Fair

There will be no passes issued this year for the New Castle fair. This is the announcement of A. Clyde Shoaf today. "In past years we have had considerable difficulty with the pass situation," said Mr. Shoaf. "There seemed to be no end to people who believed they were entitled to pass privileges. This year it will be different. There will be no passes printed for anybody."

While the fair season is some months away Mr. Shoaf is already busy on his preliminary plans. It looks like a good fair year and New Castle is going to have the best fair of its career if signs mean anything.

Pirates Win In Ten Innings 7-6

Dodgers Again Humbled By Hustling Pirates In Game At Forbes Field

INDIANS SCALPED BY ATHLETICS

By PAT ROBINSON
International News Service Sports Writer

NEW YORK, May 8.—The eastern clubs now touring the western half of the National league are finding the going rather rough with only eight victories chalked up against eleven defeats. But they're slipping along in high compared with the westerners of the American league who have won only three while dropping twelve stumbling through the east.

In the National, the Braves and Giants have a winning margin, the Dodgers have split even and the phantoms Phils have lost all five played to date. The Cubs, Cards and Pirates show something on the right side of the ledger but the Reds have lost everything but their shirts. In fact, the Reds have now dropped eight in a row and at their present pace would wind up the year with 27 won and 127 lost for an all-time low.

All four astern clubs in the American league have won more than they lost.

The strong clubs of both circuits seem to be stronger than ever—or maybe they only appear so by contrast—and the weaker ones—notably White Sox, Reds and Phils—ought to be made to pay to get into the ball parks.

Indians Defeated
The White Sox yesterday trotted out a lot of lads humorously called pitchers and when the Senators got through with them the score was 17 to 7. The Browns were almost as bad as the Yanks bounced them around, 14 to 1.

While Mr. Edwards takes considerable interest in revealing the number of college men in the league and what their athletic activities were before they heard the siren call of big league baseball and big league baseball pay checks.

Pirates Win
The other league ran strictly to form. The Pirates had to go 10 innings to trim the Dodgers, 7 to 6, and the Cards downed the Braves, 10 to 5, with homers by Rothrock and Collins making life pleasant for Tex Carleton.

The Cubs took the blankets off Bill Lee and that young man made his major league debut as a starting pitcher good by holding the Phils to four hits and shutting them out, 2 to 0. The Phils again got a well pitched game from Holley and Davis but there still is a rule in the books that you can't win ball games without runs.

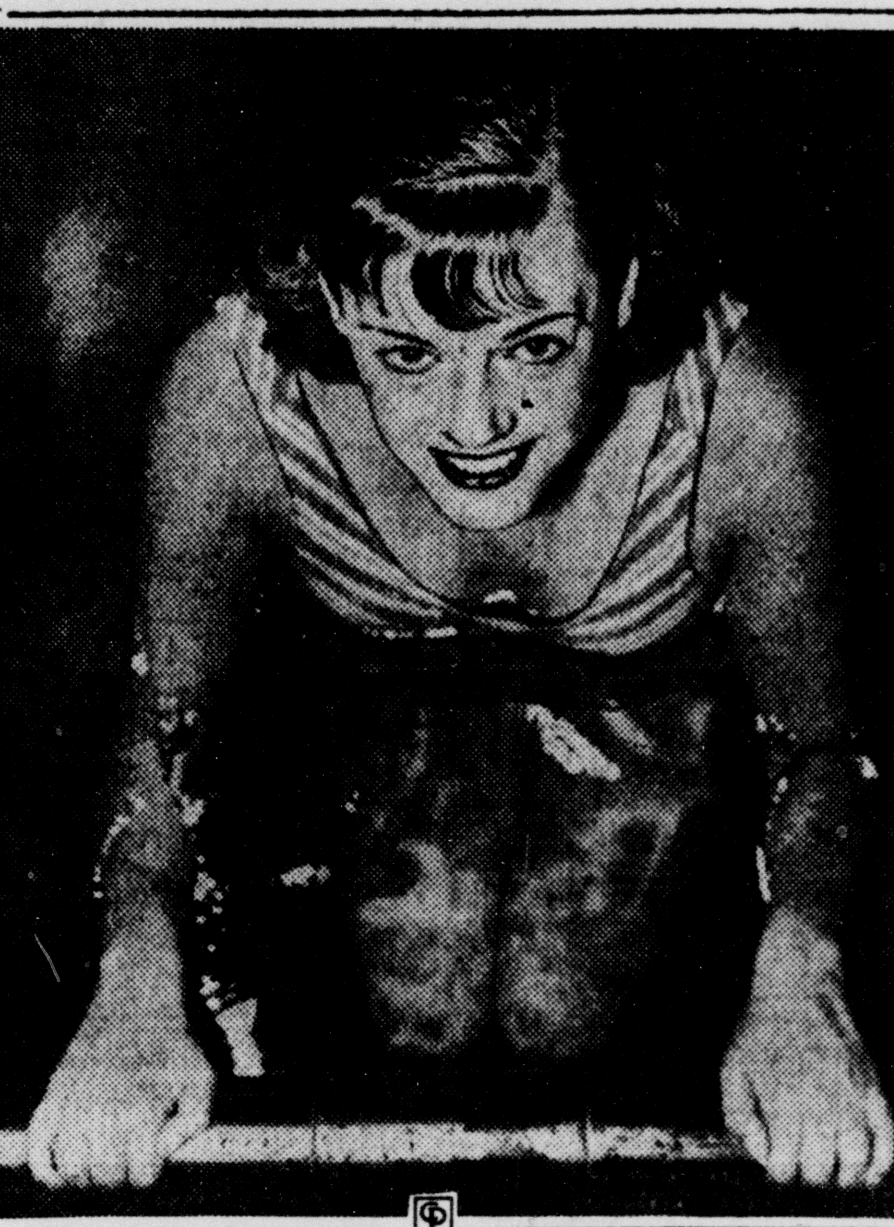

Ben Frey had a ball game won against the Giants for eight innings but he blew in the ninth when Ott doubled two across and the Giants came through, 3 to 2. Lefty Hubbell was a bit shaky in spots but it is to be noted he didn't blow when his brother Giants put him in front. Class, it seems, counts.

Here's Mrs. Eleanor Holm Jarrett, famed swimming star, pictured in a pool in Hollywood, Cal. She hopes soon to add to her laurels as a champion swimmer, which included participation in the Olympic aquatic events in 1932.

SPYING ON SPORTS

There is a distinct collegiate air about the American league this season. There should be—for 68 of Mr. Will Harridge's athletes are former students and campus athletes.

This fact is revealed by Mr. Henry P. Edwards, public relations counsel for Mr. Harridge's circuit.

While Mr. Edwards takes considerable interest in revealing the number of college men in the league and what their athletic activities were before they heard the siren call of big league baseball and big league baseball pay checks.

However, what strikes your correspondent more interesting is the fact that no less than 32 of these lads are fraternity men, fully equipped with the usual secret passwords, pins and lodge loyalties.

On this last—the loyalties—we're not so certain.

For instance Pitcher Oral Hildebrand of the Cleveland Indians and Catcher-Manager Mickey Cochrane of Detroit Tigers are both Lambda Chi Alphas. Yet Lambda Chi Alpha Hildebrand does his darndest to make Lambda Chi Alpha Cochrane fan feebly and look foolish when their paths cross on the diamond.

It is interesting to note that the Phi Delta Thetas make the best ball players of all fraternity men. At least there are more of them in the American league than any other kind of Greek letter kid.

The four Phi Deltas are Outfielder Carl Reynolds of Boston, Catcher Herold (Muddy) Ruel of Chicago, First Baseman Lou Gehrig of New

York and Catcher Charles Berry of Philadelphia.

The White Sox may not win the American league pennant in fact, they won't unless a miracle happens—but they can look down on the other seven clubs as a more or less uneducated lot.

Eleven Chicago players are former college men. Detroit has ten and so has New York. Cleveland is the most uneducated team in the circuit with but six ex-collegians.

The most educated man in the circuit still is Moe Berg, the Washington catcher. He is a product of three big schools—Princeton, Columbia and the University of Paris and speaks seven—or is it 17?—languages including Diamonddeutsch, which contains only four words: "When do we eat?"

Henry (Zeke) Bonura, the sensational young Chicago first baseman is next to Moe with two schools—St. Stanislaus and Loyola of New Orleans, La.

While such famed athletes as Gehrig, Cochrane, Ruel, George Earnshaw, Tom Bridges, Joe and Luke Sewell, Monte Weaver and Buddy Myer are listed as ex-collegians, it will be noted that many another capable and smart American leaguer is not in the list.

For instance, Babe Ruth, Jimmy Fox, Lefty Grove, Bill Dickey, Al Simmons, Wesley Ferrell, Red Kress, Ben Chapman.

Only two managers—Lew Fosse, one-time St. Mary's man, and Cochrane, who battled on the grid for Boston university—are college men. However, the most successful American league managers of the last ten years or so—the pennant winners—have all been non-college men including that venerable leader, Connie Mack.

And no one has ever accused Mr. Mack of lacking brains.

The best neighborhood to live in is just inside your income.

Wednesday Afternoon; An-

Marking the 50th anniversary of the opening of America's first Y. M. C. A. camp, Camp Dudley in New Jersey, the local Young Men's Christian association today was ready to stage a "cadet camp jamboree" in the room of the boys' department on Wednesday afternoon, May 9, at 4:30 o'clock.

Physical Director Henry T. MacNicholas said only cadet campers—boys ranging from 8 to 12—would be eligible to take part. A swim in the pool, eats and a camp program in the boys' department are listed on the program.

Monday, throughout the United States, there was an observance of National Camping Day, designated by the Y's national council. The jamboree on Wednesday is to constitute the local celebration.

"Cadet camp" at Camp Fred L. Rantz, Mr. MacNicholas said, will be held for one week in advance of the regular camping period. Plans are to make the younger boys' period one of real enthusiasm and profit this year. The indoor rally, it was said, will be held purposely for those boys between 8 and 12 who is a Y member and for guests. Each Y fellow is allowed to bring one or two chums.

Boys' Work Secretary Harry McClellan is working with Mr. MacNicholas on the plans.

ON May 14 tires and tubes are slated to advance in price, 33 per cent, and more than that. Uncle Sam is going to set the retail price and you are all going to pay that price. Now listen, folks, if you need tires, for goodness sake see Frank A. Dewberry and get a set before May 15, a set of Dayton Thorobreds, guaranteed for 15 months—won't it be easier to pay \$10 for a tire now than \$15 for the same tire after the 14th? And when you are about it, fill up on Fleetwing gas and oil too. 1712-6

Stock Market Regains Measure Of Composure Today After Sharp Sell Off

AUTO STOCKS ARE
SLIGHTLY HIGHER

(International News Service)

NEW YORK, May 8.—The stock market regained a measure of its composure today after yesterday's sharp sell off and rallying tendencies appeared in sections of the list. Railroad shares were in better demand apparently reflecting short covering after yesterday's persistent liquidation and gains of a point appeared here. New York Central, Atchafson, Northern Pacific and several others were improved.

Auto stocks also were slightly better with Chrysler up nearly a point. United States Steel was firmer and slightly higher.

The rallying tendencies, however, were not particularly impressive since they were not accompanied by any volume and there still appeared to be pressure on various groups. Notably the utilities. American Telephone was promptly offered on the opening bulge and just managed to hold around yesterday's closing level as did Consolidated Gas.

The commodity markets offered little incentive to traders for the advance. Wheat was hit by profit taking and reports of rains over the belt and sold down fractionally. Cotton declined nearly 50 cents a bale, and silver lost almost one-quarter cent an ounce.

Mining shares were inclined to be somewhat easier as were the aviation and chemicals where Allied Chemical lost 2 points.

Oil shares were slightly steadier but showed very little recuperative power.

Foremen's Club
Has Election Of
Officers Monday

W. Bruce Hunter, Jr., Succeeds J. E. McDanel As President Of Organization

ANNUAL REPORTS
HEARD LAST NIGHT

ELLWOOD CITY, May 8.—Foremen's Club of the local National Tube Company held its concluding business meeting of the year Monday night in the Shelby club house with 125 in attendance.

The result of the annual election of officers, which were held by mail, was announced at this time.

W. Bruce Hunter, Jr., succeeded J. E. McDanel as president. Mr. McDanel, who just concluded a two year's reign and one of the most successful periods in the club's history was among the first to congratulate Mr. Hunter.

The remaining officers, Paul Flautz, as vice president; George W. Wilson as secretary and Thomas A. Graham as treasurer, were all re-elected.

In his annual report vice president Flautz announced that the club was bringing to a close one of the most successful years in its history. Eight monthly meetings were held at which there were prominent speakers. The meetings also included the dinners, luncheons, and social features. There were 12 conferences at which topics of general and mill interest were discussed with local leaders in charge. At these there was an average attendance of 90.

Two regional conferences—the Western Reserve Association of Foremen at Youngstown, O., with an attendance of 100 from here; and the National Association Foremen's Convention at Akron, O., with an attendance of 21 from Ellwood City.

One outdoor picnic having about 350 present; one family night party and entertainment with about 550 participating. About 300 attended the District Safety Rally at New Castle.

Mr. Flautz also stated that the membership of the club had been increased 50 per cent, which now practically includes all the Foremen in the plant.

The club plans to attend two plant visitations, which will end its season. This evening a large delegation will visit the New Castle Tin Mills and on May 19 they will inspect the plant of The News. For this the delegation will leave Ellwood City at 2:30 p. m.

Mr. Flautz and Mr. Wilson were elected to attend the Western Reserve Foremen's Association Conference at Youngstown on Saturday May 12. President Hunter and Mr. Flautz were selected to attend the National Association of Foremen's Convention at Wheeling, W. Va., on June 15-16.

After their business meeting the club heard an interesting address by J. W. "Deacon" Reinhardt, director and chairman of the Education Committee of the National Association of Foremen. Mr. Reinhardt is from Youngstown. His subject was, "The Personal Responsibilities of a Foreman in Fair Dealings with the Employer and Employee."

Great Britain Will Not Make Full Payment

(International News Service)
LONDON, May 8.—Great Britain does not intend ever again to make full payments on her debt to the United States in accordance with the terms of the Baldwin debt funding agreement it was stated on high authority today.

This attitude was taken, it was declared, in the face of reports from the United States that debtors who fail to make full payments of installments due in June will be regarded as in default. The British government, it was asserted, intends to adhere to the repudiation of the Baldwin agreement when made it resorted to token payments on debt installments which fell due in 1933.

The disposition here apparently is to leave the solution of the debt problem up to President Roosevelt.
